125 Pentatonic Licks

2nd Edition

By David Haq

Of Anvil Guitar Instruction

A simplified approach to lead guitar for beginning and intermediate guitarists.
Have you spent hours and hours learning and practicing scales but when it comes time for your solo you still do not know what to play? Or maybe you feel like you are playing the same stagnate licks again and again. If that sounds familiar then this book is for you!

In order to use this book it would be helpful to be familiar with the CAGED system and the pentatonic scale, however it is not necessary.

Each of the five chapters focuses on 1 of the 5 patterns of the CAGED system. Everything in this book is presented in the key of A minor so that you can see how it all relates together and so that you can begin to string licks together into larger ideas. Traditionally, many Guitarist learn the minor pentatonic scale first and relate all other scales (such as the Diatonic Major and Minor Scales, etc.) to it, so if you are new to scales and lead playing this book will put you in good company.

Each chapter is comprised of 25 licks:
- 10 two measure licks
- 10 repeating/looping
- 5 position shifting extending licks

These licks are designed to be simple and rhythmically uniform so that they are easily applicable. Although any of them can be used in a solo they are intended to teach your fingers how to move through the scale pattern without sounding like you are practicing a scale. Each lick is 2 measures of straight eighth notes. Many of the licks do not resolve so that you will be forced to use your ear when inserting them into your playing. The goal for any guitar solo is to create a seamless composition, when you are forced to use your ear to guide you from the end of a lick into your next move it will encourage you to create more melodic and continuous lines. All the licks in this book are presented in the key of A minor so try playing them over an A minor chord and a C major chord and see what they sound like. Once you’ve mastered the licks in the written key try transposing them to all the other keys.

Once you memorize the licks you are encouraged to experiment with them.
- Play around with the rhythms (add rests, add triplets, add sixteenth notes… the possibilities are endless).
- Play around with the tempo (Try changing all of the eighth notes to sixteenth notes)
- Play around with the articulation (add/remove h/p/s)
- Play around with the order of notes (play pieces or whole licks backwards or mix up pieces from different licks)
- Play the position shifting licks backwards.
- Use knowledge of the full diatonic scale and arpeggios to substitute/add different notes/chord tones
